

Dakota Coders

A club for those who like to program

What will we do?

Learn basic concepts of programming
Create NodeJS and SocketIO web apps
Write some awesome code!

What will I need?

A Laptop

It doesn't have to be a great one, it doesn't even have to be a good one, but you have to be able to bring it with you each week. Mac, Windows, Linux, they'll all work the same. Be sure to bring it to the first meeting!

Computer Experience

You need to know how to use a computer, and it will be easier the better you are at it. If you know what command prompt is, you should be fine.

What won't I need?

Programming Experience

Whether you have been writing code for years or you've never written a line, you'll fit right in.

An Application

This year we've decided to abandon the application process. Anyone is free to come and have a good time with us.

When is the first meeting?

Wednesday, October 15th after school in Mr. Giannini's room (Room 244, above the atrium). If you could, shoot me a text to let me know you're coming so I can know how many people to expect.

How can I get in touch?

Feel free to text Paul Hollinsky at (586) 913-1228 or hit me up on twitter @CPCookieMan. We'll get a Google Hangouts group chat going once the group is formed.
